

# Ferrartis Rail Solutions

from Unipart Rail

It's not rocket science, it's space engineering

Reduction of storage and transit space,  
environmental impact and costs

Increased asset safety and protection

Optimisation of the end to end journey  
with short term pay-backs

# What are your storage and transit issues that need a new approach to solve?

Through our partnership with specialist design engineers Ferrartis, Unipart Group Australia can offer a unique combination of resources to identify and build holistic solutions for storage and transit requirements that will save costs, space and environmental impact.

Combining the experience of the Ferrartis and Unipart teams, together the two companies provide a comprehensive design-based approach to tackle storage, lifting, transportation and operational issues that require simple but effective solutions.

Since Ferrartis Engineering Services was established in 2009, the company has greatly expanded their capabilities to include high-quality bespoke fabrication, design and project management services that are tailored to meet the needs of the clients.

Storage and logistics solutions have been recently provided by Ferrartis to Alstom, Bombardier, Hitachi and Siemens for wheel sets and bogies.

With an agile project team, ideas can be created, developed and prototyped in a few weeks with the final solution being available for manufacture in significantly reduced timescales compared to traditional engineering development processes.

All products are fully engineered and tested to the highest performance standards that are required by the rail industry. Many products have extended warranties to verify their longevity and fitness for purpose.

**Ferrartis solutions provide tangible operational, logistical and financial savings for the storage and transportation of components for the rail and associated industries. Examples of savings made for clients include:**

**TRANSPORTATION  
COST REDUCTION**

**REDUCTION IN  
PROCESSING TIME**

**SAVING OF  
STORAGE SPACE**

**Space Saving / Utilisation**

**Safety Improvements**

**Rapid Payback**

**Environmental and Logistics Savings**

**Asset Protection**

## About Unipart Group Australia

Unipart Group Australia is part of Unipart Group a leading manufacturer, full service logistics provider and consultant in operational excellence. Operating across a range of market sectors, Unipart offers a breadth of services to a wide range of blue chip clients internationally.

Unipart Rail, a division of Unipart Group, is a leading specialist provider of technology and supply chain solutions for the rail industry; with expertise in infrastructure, signalling and traction and rolling stock products.

## About Ferrartis Engineering Services

Ferrartis Engineering Services, a UK company, provide professional engineering services to a wide range of sectors, organisations and companies. Ferrartis began life supplying rail storage and transport solutions, and have a comprehensive understanding on the unique challenges for rail depot projects.

Many of their product solutions have been adopted as the standard in the UK including solutions for wheel pans, wheelsets, bogies, air conditioning modules, air reservoirs and transformers.
